

FRC Team 1640 – Sab-BOT-age

2011 Duel on the Delaware – Post-Mortem

What worked:

- We won!
- Drivers & Field Team
- Drive Station
- Scouting
- Minibot (the good one)
- Scored well (tube hanging & minibot)
- Dancing
- Robot reliability
- Reputation
- Relation with MOE

What didn't

- Lack of preparation
 - Wheel treads needed changing prior to competition – we knew this
 - Packing – no packing list – did not bring everything needed
 - No pit list
- Autonomous – compounded by missing our practice rounds due to tread replacement – we were going to use these for autonomous testing
- Have confidence in our strategy – we allowed personal desires (of alliance partner) to drive our actions
- Scream is alliance partners to something stupid (see above)
- Keep better pit records – we took (2) batteries, a charger and a minibot out of service due to suspected problems but could not confirm trends due to lack of records.
